Untitled query

```sql
--Filter all transactions that occurred in the year 2023.
--Expected Output: All columns
SELECT *
FROM `bigquery-retail-sales.retail_analytics.Sales`
WHERE Date BETWEEN '2023-01-01' AND '2023-12-31';

--Display all transactions where the Total Amount is more than the average Total Amount of the entire dataset
--Expected Output: All columns
SELECT *
FROM `bigquery-retail-sales.retail_analytics.Sales`
WHERE `Total Amount` > (
    SELECT AVG(`Total Amount`)
    FROM `bigquery-retail-sales.retail_analytics.Sales`);

--Calculate the total revenue (sum of Total Amount).
--Expected Output: Total_Revenue
SELECT SUM(`Total Amount`) As Total_Revenue
FROM `bigquery-retail-sales.retail_analytics.Sales`;

--Display all distinct Product Categories in the dataset.
--Expected Output: Product_Category
SELECT DISTINCT(`Product Category`) As  Product_Category
FROM `bigquery-retail-sales.retail_analytics.Sales`;

--For each Product Category, calculate the total quantity sold.
--Expected Output: Product_Category, Total_Quantity
SELECT `Product Category` As  Product_Category ,
       SUM(`Total Amount`) As Total_Quantity
FROM `bigquery-retail-sales.retail_analytics.Sales`
GROUP BY Product_Category;
```
